EXPERIENCE

HIGHLIGHTED PERSONAL PROJECTS   Remote
Full Stack Web Developer   September, 2022 – Present

"MediChecker" is a web application that could provide the count of new drugs, which were approved by the U.S. Food and Drugs Administration, in the last 7 days. The app shows the count as per category (route) and shows details by each record within the selected category. Data is fetched from openFDA API.
- Built with: React.js, Redux, HTML5, CSS3

"MyMeals" — is about building your own web application based on an external API. The application provides a lot of recipes for dishes with beautiful pictures and a list of ingredients.
- Built with: JavaScript, HTML5, CSS3
